

Thank you for your interest in receiving version two of the Practice Support Program Physician Profile Analysis report from the General Practice Services Committee (GPSC). The GPSC hopes that the report provides you with valuable information to assist you in providing recommended care to your patients. If you have ideas on how this report could be improved to help you, please provide that feedback to the contact below.

The Physician Profile Analysis report and if applicable, a list of your majority source of care (MSOC) patients with specific chronic conditions are contained on the enclosed CD. Please see the attached instructions on how to access these items.

The Analysis report provides summary demographic and patient complexity information for your practice. It also gives a five year summary with patient specific information for the 06/07 fiscal year for your MSOC patients with Diabetes, Congestive Heart Failure, Hypertension, Chronic Obstructive Pulmonary Disease and/or Chronic Kidney Disease. The MSOC rule requires that the patient had at least 3 physician visits (across all GP's) in a year and that you provided the majority of those visits. This information is being provided as part of the Practice Support Program and is not related to any Ministry of Health Services or BC Medical Association auditing functions.

If applicable, a list of the same MSOC data for patients with Diabetes, Congestive Heart Failure, Hypertension, Chronic Obstructive Pulmonary Disease and/or Chronic Kidney Disease in an xml file format is included.

Please remember, in accordance with the requirements of both the *Personal Information Protection Act* and the College of Physicians and Surgeons of British Columbia, the Analysis report and all personal information contained therein must be kept confidential and in a secure location in the same manner as all other patient medical records.

If you have any questions regarding the Practice Support Program or the report please contact:

Primary Health Care Branch
Ministry Of Health Services
